<p>. Primary materials under a supranational jurisdiction</p> <ul style="list-style-type: none"> * The notes under Auxiliary Schedule S2 apply here also, except that those relating exclusively to national jurisdictions are replaced below by similar ones relating to supranational jurisdictions. * This schedule gives in one sequence classes appropriate to all kinds of supranational jurisdictions. However, it is based on the requirements of the European Union (by far the most developed example of a supranational community) so the detail is greater than is likely to be required under less formally organized bodies or those of more restricted scope. * This means that most jurisdictions will not use all (or even many) classes provided - only those appropriate to it. A demonstration of its full use will be found under the law of the European Union, at SG. * Add to - (where the hyphen represents the classmark of the jurisdiction) 23/29,2A/2Y below, so far as applicable; e.g. SG2 P European Union - Court decisions. 	<p>2A Legislative & executive documents, official documents</p> <ul style="list-style-type: none"> * Publications of the law-making institutions of the supranational jurisdiction. These are unlikely to follow the pattern found in national jurisdictions (legislature, executive, administration, judiciary) & adjustments may be necessary. For an example of what these institutions might be like, see European Union SG2 B. * For the supranational body as a political organization (including official documents presenting its political & social policies & operation) see Class R Politics. This class takes only that literature which serves as primary material in studying the law of the jurisdiction. * If in doubt, prefer Class S. * For legislation, acts, etc., see 2L. * Each institution or organ may be qualified as follows: * Add to - (where the hyphen represents the classmark of the institution or its organ) as follows: % - 8E Journals % - 8J Calendars % - C General papers % - D Proceedings, debates % - G Bills % - H Working papers % - J Resolutions, opinions % * If these have the status of secondary % legislation, use 2NJ. % - M Committees % - S Official reports (general) % - U Other materials

 * Add to 2X numbers & letters 5/Y in Auxiliary Schedule S1; e.g. 2XN Economics & finance.
- Auxiliary Schedule S4
 . For an alternative arrangement of common law systems
 * This is a guide for librarians wishing to adopt an alternative arrangement (not recommended) for classes SL/SQ. In this alternative, common law is treated as one integral system, in which the individual national jurisdictions (UK law, USA law, Australian law, etc.) are treated as subclasses to be cited after the particular branches of the common law.
 * For example, all contract law based on common law would be kept together, irrespective of the national jurisdiction concerned. If it were thought necessary to distinguish (say) an English treatment of the subject from an American one, this would be effected by qualifying the subject classmark by the country classmark (introduced by 4). See SPE below for an example.
 * The alternative schedule is as follows:
- SKY Common law systems
 * Completely general works only; for primary materials see SL/SO; for secondary materials, see SP.
